

V Cut Machine CWVC-300

High Accuracy Pneumatic Pcb Cutting Machine With Ce Approval CWVC-330 pcb cutting machine CWVC-330 Feature:

1. Pneumatically driven and electromagnetic valve control.
2. Depaneling process without vibrations due to pneumatic drive unit .
3. Depaneling PCBs with sensitive SMD, capacitors or thin board even to 0.3mm can be depaneled safely.
4. Depaneling operation is that operator stamps the foot pedal to Depanel PCB.
5. Highest components near the v groove of PCB can be up to 70mm.
6. The minimum distance is allowed to be 0.5mm between V groove and the electronic components.
7. Gap for insertion of PCB can be easy to adjust by the adjusting knob in front of the machine.
